The MatStats Show is Here to Create a Library of Statistical Analysis for the NWCA.

Episode
52-3

- Mike Moyer, the Executive Director of the NWCA, approached the MatStats gang to create a library of statistical analysis for the NWCA.
- This is an effort to help grow the sport and educate the wrestlers, coaches, and fans.
- When MatStats was created in 2020 (book) and 2021 (monthly show), there was a serious need for statistical analysis.

Are there any disclaimers MatStats needs to let everyone know about their shows?

The Opinions Expressed on this show do not necessarily reflect any policies or opinions of the NWCA. Also, the MatStats guys do not always agree on all things discussed on their shows.

Episode
52-4

- MatStats is a subsidiary of the NWCA but is a separate entity that voices its own opinions on its statistical analysis.
 - MatStats three hosts, Gormley, Bryant, and Hazard are all equally responsible for all the good outcomes. Gormley for the bad feedback.
- Gormley writes the Power Points and selects the topics. Gormley uses the term MatStats often, but many times it is Gormley's opinion alone.
- Gormley does the stats work and then the three hosts & occasionally guests brainstorm about Gormley's findings and ideas.
 - MatStats is designed to have educated thoughts and opinions to help the world's oldest and greatest sport.
- Wrestling is all about settling disagreements. The hosts are too old to settle these disagreements on the mat.
- Sometimes we agree, sometimes we disagree. It makes the world go round.

How is MatStats different than most shows we see on TV/Internet in today's world?

Episode
52-5

MatStats is based on numbers, stats, and analyzation. It starts with facts not opinions.

- MatStats is a numbers show.
- Thus, the name MatStats. Not MatOpinions.
- Gorms was remiss not explaining this from the get-go. Gorms lives in a numbers world and is starting to get the feeling not everyone does lol.
- Feedback from the Tribe alumni during this show has made Gorms realize he needs to address this and try to educate people with numbers. Thank you, Dr. Powell, for one of your texts.

Updates “*On A Clear Day, You Can See College Athletics.*”

Episode
52-8

- Gorms, could you give us a quick update on some major events that we dealt with in our 3-part series, “*On A Clear Day, You Can See College Athletics.*”

The Ohio State & Tennessee saw record revenues in 2024-25, but what does the future hold?

Episode
52-9

- Two of the Athletic Departments with blue blood (or in this case Scarlet or Orange) football programs have happily reported revenues of over \$300M for the first time ever in the 2024-25 FY.
- Of course, their expenses also skyrocketed. This is what happens in colleges.
- Both The Ohio State & Tennessee reported profits from these \$300+M revenues of \$15.7 & \$15.9M. When you read their press releases everything seems Rosey.
- The fail to accentuate the Rev Share that starts in 2025-26.
- Can they continue to increase their revenues and reign in their expenses?

How does the Rev Share starting in 2025-26 affect their profits?

The picture is significantly different once you account for Rev Share starting in 2025-26.

Episode
52-10

School	Revenues	Expenses	Profit	Rev Share	Profit-Rev Share
The Ohio State	336.1	320.4	15.7	-20.5	-4.8
Tennessee	304.1	288.2	15.9	-20.5	-4.6

All dollar amounts in Millions

Texas & Oklahoma both lost money in 2024-25 and they cite not getting a full share of the SEC payouts yet, but is the light at the end of the tunnel an oncoming train?

**Episode
52-11**

- Two other blue-blood (Burnt Orange & Crimson in these cases) football programs suffered massive athletic department losses in 2024-25.
- They are quick to blame this on that they have not received a full SEC share of the conference distributions yet since they left the Big 12 quickly for what they thought was greener pastures in the SEC.
- They fail to mention the Rev Share they need to account for starting in 2025-26.

What would Oklahoma and Texas profit/loss look like if they got a full SEC share and had to pay Rev Share?

Even with a full SEC Distribution when you include Rev Share there isn't a good profit scenario for Texas **(+\$3.2M)** or Oklahoma **(-\$17.2M)**.

Episode
52-12

School	Profit	Increase SEC Distributions	Rev Share	Adjusted Profit
Oklahoma	-43.7	+47	-20.5	-17.2
Texas	-23.3	+47	-20.5	+3.2

All dollar amounts in Millions.

Will MatStats have a follow up show on this topic in the future?

If The Ohio State, Rocky Top, Boomer Sooners, & Hook 'Em Horns are in tight financial situations, what is the rest of the country like?

Episode
52-13

- A word of caution from MatStats, if these 4 hallowed Athletic Departments struggle to make a profit or turn a loss, what does the future hold?
- MatStats will dive deeper into this question once the 2025-26 financials are available.

- They are regionals. Geography dictates what schools are in which regional.

The increase in GIAs in men's big 3 sports leaves the school with two choices - add a woman's team or drop a men's sport.

Episode
52-43

- There are two main options for college Presidents and Athletic Directors that decided to increase the number of GIAs in the Men's 3 big sports -
 - 1) Start a Women's team.
 - 2) Drop a Men's team.

- Many D1 NCAA schools numerically might not be able to drop a men's team with a minimum number of men's teams required (6). FBS schools must have 16 teams (Men & Women combined).
